

THE UNIVERSITY OF MICHIGAN  
REGENTS COMMUNICATION

ACTION REQUEST

Subject: Subcontract Agreement between the University of Michigan and  
The Hope Foundation

Action Requested: Authorization to enter into Agreement

Preamble:

A statutory conflict of interest situation was identified by the Office of Research and Sponsored Projects while reviewing the Proposal Approval Form which then triggered a review by the Medical School Conflict of Interest Board. A plan for management of the possible risks associated with the conflict of interest was then developed and approved by the Board and agreed to by the parties involved.

This proposed agreement (“Agreement”) falls under the State of Michigan Conflict of Interest Statute because Professor James Rae is an employee of the University of Michigan (“University”), and Secretary of the Board of Directors for The Hope Foundation. The law permits such an Agreement provided it is disclosed to the Board of Regents (“Regents”) of the University of Michigan and approved in advance by a 2/3 vote.

Background:

James Rae, PhD, a Professor in the Department of Internal Medicine, is the Secretary of the Board of Directors for a non-profit foundation called The Hope Foundation (the “Company”). The Company wishes to fund The Jackson Laboratory (prime) sponsored project entitled “Determining tumor molecular profiles in the cerebrospinal fluid (CSF) from cancer patients with central nervous system (CNS) involvement” (ORSP #18-PAF00874) in the Department of Internal Medicine-Hematology/Oncology under the direction of Dr. Daniel Hayes. The purpose of this project is to determine molecular profiles of cell free DNA (cfDNA) in the cerebrospinal fluid (CSF) and compare with molecular profiles using the non-CSF source (blood and tissue), and to examine different sample testing conditions for molecular profiling of cfDNA using various CSF sampling volumes and archived (> one year) CSF samples.

Agreement Terms:

The terms of the Agreement conform to University policy. The period of performance for the project is approximately one (1) year. The amount of funding support will not exceed \$15,068. Since research projects are often amended, this agreement includes provisions for changes in time and scope. University procedures for approval of these changes will be followed and additional conflict of interest review will be done as appropriate.

Impact of the Agreement:

The Agreement will support an effort by Dr. Daniel Hayes to use his expertise and University laboratory, as well as other University resources, to enroll adult cancer patients and collect CSF, blood, and archived tissue specimens from patients with CNS metastasis at the University of Michigan, and create and maintain a database of study patient and collected data, in pursuit of the purpose described above.

Recommendations:

This matter has been reviewed and approved by the Medical School Conflict of Interest Board. In light of this disclosure and our finding that the Agreement was negotiated in conformance with standard University practices, I recommend that the Board of Regents approve the University's entering into this Agreement with The Hope Foundation.

Respectfully submitted,

S. Jack Hu  
Vice President for Research

July 2018
