

THE UNIVERSITY OF MICHIGAN
REGENTS COMMUNICATION

ACTION REQUEST

EXH

MOTION

APPROVED BY THE REGENTS

DEC 15 2005

Subject: University of Michigan Transportation Research Institute
Fire Alarm System Upgrade and Fire Suppression System Installation

Action

Requested: Approval to Proceed with Project

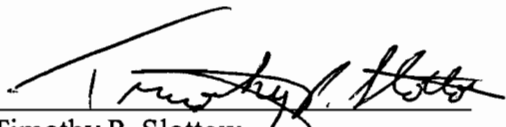

Background:

The University of Michigan Transportation Research Institute was built in 1969. The facility includes approximately 78,000 gross square feet of space consisting of offices, research laboratories, and a high bay garage. This project will upgrade the fire detection and alarm system to meet current codes and standards, including those set by the Americans with Disabilities Act, and install a fire suppression system to provide coverage throughout the building. The scope of this project includes the architectural, mechanical, and electrical work necessary to accomplish these improvements. There will be no impact on parking from this project.

The estimated cost of the project is \$980,000. Funding will be provided from investment proceeds. The construction cash flow may be provided, all or in part, by increasing the commercial paper issuance under the commercial paper program, secured by a pledge of General Revenues, and authorized by the Regents. The University of Michigan Department of Architecture, Engineering and Construction will design the project. Construction is scheduled to be completed in Fall 2006.

We recommend that the Regents approve the University of Michigan Transportation Research Institute Fire Alarm System Upgrade and Fire Suppression System Installation project as described, and authorize issuing the project for bids and awarding construction contracts providing that bids are within the approved budget.

Respectfully submitted,

Timothy P. Slottow
Executive Vice President and
Chief Financial Officer

December 2005
